TULIPS

We have numbered our varieties to make it easier to choose a selection for your own garden, from one of the largest existing collections in the country.

Fall planting bulbs of all descriptions will be extremely scarce this year, and we therefore urge everyone to place their order early, to avoid disappointment.

The number after the name of the tulip designates the approximate height of that variety at blooming time. The letters following the height indicate as follows:

E. — Early blooming. M. — Medium blooming.

L. — Late blooming.

NARCISSI OR DAFFODILS

In order to have a beautiful bulb garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States. They are not only excellent for outdoors, but millions are used every year for forcing indoors their graceful form. Beautifully shaped trumpets and cups. The long straight stems have made them favorites for cut flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor and outdoor purposes.
